Dear Local Data Managers,

Above you can see which final analyses, interim analyses & presentations are planned for HOVON studies in the next 6 months.

Between brackets the name of the congress where the study data are to be presented (if applicable) and the time period in which the CRF data are to be completed and cleaned in order for the statistical department to prepare the data in time for abstract submission/reporting.

Of course we always strive to have all patient data completed on time for each HOVON study, but we hope this overview will assist you with your planning.

This list will be updated in case there is a change in the planning & new plans will be posted when they become available.

Kind regards,  
The HOVON Data Center.
